

THE RIPPER RUNDOWN

Manager's Update

It takes a special kind of human to be able to perform in -40. There is no question that this past 4 weeks, with the Artic temperatures, has tested everyone but no more than all of ATI's Rockstar Mechanics. A huge thank you all of you who braved the cold, who wore the extra layers, put on the winter boots, got the wool socks out and headed out into the dark and executed your work like champions! #realmenshit

ATI has sent out some new year toys to play with; three brand new, bad ass, Brutus Beasts have been deployed to add the horsepower to compliment your expertise. AT55 headed west to Conuma Wolverine, AT53 kicked off a new project at Syncrude for Centerfire and AT56 will find a home at our largest operation – KMC Mining.

On a final note, I want to thanks to all our techs for the awesome constructive feedback and suggestions we have received over the past few months. ATI is constantly trying to improve our processes and clean up our systems to make your working lives as easy and hassle free as possible. On the travel side, you wanted easier routes, and less transfers - we are doing our best to make that happen.

ATI will open Grande Prairie as a major hub for our western Canada Coal operations. We are also working with Elite to cut down wait times, add rental cars and direct flights where possible. These changes will aid in creating efficiencies to get you to and from work seamlessly and safely.

Here's to a legendary 2022!

Jaye Robinson - CEO

★ Scan the QR Code to respond to the following questions:

- 1) Who joined this kick arse company as they were sick and tired of being treated like "just a number" and is now happier than ever working at ATI Canada?
- 2) Who currently works at ATI Canada and feels the 2021 growth lost sight of our roots and now feels like "just a number"?

We appreciate your anonymous feedback!

Safety Moment

Working together...work safely

If everyone is moving forward together and taking responsibility for their safe work environment then safety takes care of itself.

Congrats!

KHALEB WHITEHURST

Khaleb is one of our senior techs who has consistently provided top notch work. Not only does he go out of the way to help after hours, but he has received praises from supervisors at KMC for his work and amicability. Keep up the stellar work at Syncrude Khaleb!
